A range of intraoral scanners based on AI technology

IOS 100 Portable

Portable

IOS 100 P is a compact system - only a handpiece, cradle and laptop

Anti-fog heating

Easily maintained scans are provided by the anti-fogging function in the cradle and the powder-free and spray-free technology

Light handpiece

IOS 100P has impressively small and light handpiece

19" touch screen

Easy file transfer

USB, SD card, local network and via Aadva Xchange

Flexible monitor positioning

Flexible arm, round and smooth surfaces, easily movable between rooms

IOS 200 Next Generation Intraoral Scanner

No calibration needed

Trouble-free and reliable results every time you scan

Magnetic cradle

Offers you ease of use and handling of the device

Visual and Haptic Feedback

Gain full control of your scanning procedure

Full colour scan

The AI based technology supports smooth scanning by eliminating soft tissue. The real colour data helps to identify margin lines

Anti-fog functionality

The built-in heating function helps to avoid fogging without preheating

Open system

The open STL scan files provide full compatibility with third party hardware and software

Autoclavable Tips

Clean tips up to 250 times. Helps prevents cross-contamination and enhances patient safety

Modular, intuitive, **case-management solutions**

General scanning features

◢ AI Technology detects the soft and moving tissues to guarantee a smooth scanning

Scan, pause, check and rescan anytime you want

Impression management system

Automatic bite alignment

◢ Multiple Data transfer options
USB, Aadva Xchange, local network

Open STL and/or PLY files

Automated import of files to Exocad

◢ Simple and intuitive user interface

Ortho Module

Customised workflow for your ortho case follow up

Dedicated PDF file creator

Possibility to record both central relation (CR)
centric occlusion (CO) bites

Integrated ortho model maker for easy 3D printing

Integrated third party communication possibilities (VDDS)

Implant Module

Customised workflow
for your implant restorations

Multiple implant scans

Simple and intuitive complete
implant case follow up

Prostho Module

Customised workflow for your crown and bridge work

Auto-margin line for your preparations

Single implant scan

Simple order sheet

Extraoral Module

Customised workflow to
suit the lab work

Easy and accurate impression scanning

Record multiple bite scans

Aadva Xchange

All-in-one approach for digital case-management.
The cloud-based platform supports communication
with the GC production and service teams
as well as with registered external dental labs.

Trainings

We educate and empower dentists
and dental lab technicians with innovative
solutions in digital dentistry.

GC Europe Campus
meeting & education centre

Support

GC Europe's customer support for its digital
dental technology is at industry-leading level.
