Packable glass ionomer restoratives

Scientifically documented – clinically confirmed in over 300 million restorations

**Fuji IX GP** & **Fuji IX GP FAST** from **GC.**

Packable glass ionomer restoratives

9 reasons why it’s the **GOLD STANDARD** for forward thinking dentists.
GC Fuji IX GP and GC Fuji IX GP FAST
The GOLD STANDARD glass ionomer restorative
Here’s why it’s the no. 1 choice...

1. Multiple indications
   - For long-term and temporary posterior fillings
   - Ideal for paediatric and geriatric patients
   - In addition it can be used for core build-ups, as liner or as a base in the sandwich technique

2. Fast bulk placement
   - Non-sticky, packable consistency enables precise adaptation
   - Single step placement even in large cavities
   - Choice of setting time
   - Available in ready-mix capsules for instant use

3. Strong chemical bonding
   - Effective ion exchange between dentin, enamel and Fuji IX GP
   - No need for etching, bonding or light curing
   - No need for a dry field or rubber dam

4. No microleakage
   - Tight, chemically-fused and bacteria-proof marginal seal
   - Flexible high bond strength for a tight and long-lasting seal

5. Long-lasting performance
   - Outstanding compressive strength and surface hardness
   - Stress-absorbing properties give long-term durability
