**GC FujiCEM® 2 APPLICATION TECHNIQUE**

---

**Storage**
Recommended for optimal performance, store at room temperature away from heat, moisture and direct sunlight (4-25°C / 39.2-77.0°F).

---

**Precautions for Automix**

Before applying mixing tip, check the two openings of the cartridge or bleed small amount of paste to ensure even flow from the cartridge.

---

**Paste Pak CARTRIDGE SL LOADING AND DISPENSING**

1. Retract piston completely into dispenser.
2. Turn cartridge fully to the right position.
3. Slide piston release forward until it stops. Remove cartridge cover.
4. Before dispensing the first time or after a long interval, bleed the pastes from the cartridge.
5. Longer side aligns the front of the cartridge.
6. Attach the mixing tip on the cartridge. Push the tip completely till the end such that there is hardly any gap between the tip and the cartridge.

---

**Application Technique**

1. Prepare tooth in usual manner.
2. Clean the prepared tooth with pumice and water, rinse and remove excess moisture. Do not desiccate.
3. Coat internal surface of the restoration and seat gently.
4. Start removing excess cement when the excess cement feels rubbery.
5. Maintain moderate pressure.
6. Finishing can be started 4 min. 30 sec. after seating the restoration.

---

**Instructions**

- Consult Instructions for Use.
- See precautions.
